

Frequently Asked Questions

.. with clear and simple answers

Why can't I find Share Radio on my digital radio?

- Share Radio has ceased broadcasting on digital (DAB) radio as of 7pm on Friday 5th May: please see [our press release of 4th May 2017](#) for more details. Our service continues online across the world, and you can reserve an internet radio from us for easy listening.

Can I listen on an AM/FM radio, or on Long Wave, Medium Wave or Short Wave?

- no: Share Radio is only accessible online, via mobile and tablet apps and internet radio, and such services as Tune-In Radio.

Are there any restrictions on accessing Share Radio online overseas?

- we do not 'stream' the online signal into the United States or Canada, as this is a financial station and there are different rules on financial promotions in those countries. Otherwise you should be able to access the signal, but use Broadband to keep reception costs under control.

Does Share Radio provide 'Listen Again' or Podcast facilities?

- you can access 'Listen Again' through our Apple and Android Apps: this are simple replays of output broadcast over the past 30 days. We also provide podcast access via our own podcast archive , which can be accessed via our Home page.

Does Share Radio have a twitter account?

- yes: please follow us on @shareradiouk

Other queries?

- just [contact us](#) . If and as questions gather round a particular question, we'll add it to this FAQ page!
