

Share Radio's top money saving apps

Share Radio has put together a list of our 'Top 5 Money Saving Apps' to help our listeners make the most of their money. All the apps featured here are free to download on either iPhone or Android devices.

- **Share Radio App** . We make no excuses for putting our very own Share Radio app in the no.1 spot. The Share Radio app complements our website and live radio shows by bringing together the very best features in one convenient app for you to enjoy whilst on the move. Available both on the [Apple App Store](#) and as an [Android App](#), you're able to listen live, listen again, check out our weekly schedule or send us a quick message – it's all contained within our app. If you have an Apple iPad, you'll find the App particularly useful with easy access to all key aspects of our service, including 'Managing My Money'.
- [RedLaser](#), enables shoppers to scan barcodes while out shopping and compare the price of an item with both offline and online stores. You can also read reviews, ratings and information about searched products. Once you find the cheapest price you can buy the item via the app, have it delivered to your home or arrange to pick it up from a local retailer.
- [MyVoucherCode](#), use GPS to send you the best money-off deals for eating out, shopping, health and beauty, travel, entertainment etc, wherever you are. Instead of printing a voucher off the internet and taking it to a retailer, you simply show the voucher on your phone screen at the store to get your discount.
- [Trivago](#), compares room rates on the main hotel booking websites such as booking.com, hotels.com and lastminute.com. So if you want to stay in a particular hotel it can tell you the cheapest site to book it through. Alternatively, if you need a hotel bed for tonight it can also use your current location to find a nearby hotel with availability and, again, the cheapest agent to book it through.
- [Kabbee](#), Ideal for people living in London, Kabbee compares more than 60 minicab firms across the capital to find the cheapest price. You can make a booking by car type, price and arrival time as well as view other users' ratings.
